

Commission Feature

API Endpoints & API-Driven UI Specification

1. Endpoints

Base URL: {BASE_URL}api/v1/

Auth: Authorization: Bearer <token>

Endpoint	Method	Query Params
agents/commission-summary	GET	none
agents/commission-history	GET	page (default 1), limit (default 20), optional search

Response envelope: { success, message, data, pagination? }

2. GET agents/commission-summary

API Field	UI Element	Behavior
totalSales	Total Sales card	Displayed as currency
totalCommission	Commission Earned card	Displayed as currency
totalCommission === null	Agency group mode	Triggers masking across entire screen
totalCommission === "0"	Commission Earned card	Shows \$0 - individual mode, NOT agency
totalSales zero/null + empty history	Empty state	Shows No sales yet screen

Agency group mode (totalCommission === null)

UI Element	Behavior
Commission Earned card	Shows XXX instead of real amount
Commission Earned subtitle	Shows Paid to agency instead of This month
Info banner	Shown with agency policy message
History row title	Masked (not client name)
History row amount	Masked (not real amount)
History row status badge	Shows XXX
History row click	Disabled - no detail modal

3. GET agents/commission-history (each item)

API Field	UI Element	Behavior
clientName / client.name / firstName+lastName	Row title	First available value; fallback to Client {id}
commissionAmount	Row amount	Signed currency e.g. +\$1.16
createdAt	Row date	Formatted as MM/DD/YYYY
status	Status badge	See status mapping
status	Filter chips	Client-side filter only - NOT sent to API
status	Detail modal timeline	Different steps per status
commissionType + commissionValue	Detail modal rate	PERCENTAGE -> 5% commission; else raw value
commissionAmount	Detail modal amount	Shown in rate row and commission row
paidAt	Timeline paid date	Used for Paid out step when status is PAID
createdAt	Timeline processed date	Used for Processed step

4. Status Mapping (API -> UI)

API status	Badge Label	Filter Chip
PENDING	Earned	Earned
PAID	Paid	Paid
CANCELLED / CANCELED	Failed	Failed
anything else	Unknown	none

5. Timeline (Detail Modal)

API status	Timeline Steps
PENDING	Processed (createdAt) -> Pending payout
PAID	Processed (createdAt) -> Paid out (paidAt or createdAt)
CANCELLED	Processed (createdAt) -> Failed -> Paid (pending)
unknown	Processed (createdAt) only

6. Pagination

API Field	UI Behavior
pagination.total	Determines if more pages exist
pagination.hasNext	Load more on scroll near bottom
page + limit	Sent on each fetch; page increments on scroll

Default page size: 20

7. NOT API-Driven (Client-Side Only)

- Filter chips (All / Paid / Earned / Failed) - filters fetched data locally
- Agency masking sale titles and amounts - generated in agency group mode
- This month label on summary cards - static text
- No commissions for this filter - shown when local filter returns zero

8. Quick Reference

GET {BASE_URL}api/v1/agents/commission-summary

GET {BASE_URL}api/v1/agents/commission-history?page=1&limit=20

Key rules:

- Agency group: totalCommission === null (not "0", explicitly null)
- Status display: API PENDING -> UI label Earned
